SPRING MODULE "THE WAKING GARDEN" OVERVIEW

Study Period:

March – May

The Plant World is beginning to come to life. As the weather warms so does the soil and we can start thinking about sowing many seeds. Flowers and leaves begin to emerge on trees and shrubs and bulbs spring into life.

"It all seemed too good to be true. Hither and thither through the meadows he rambled busily, along the hedgerows, across the copses, finding everywhere birds building, flowers budding, leaves thrusting – everything happy and progressive and occupied."

*"The Wind In the Willows";
Graham, Kenneth.*

SPRING MODULE WORKSHOP LIST

The module also explores a number of other spring themes including blossom, germination and migration.

Kindergarden's Spring module is underpinned by the Snack Pots Project. This involves the creation of an edible garden within each school. Each plant in the Snack Pot Project is selected because of its interesting botanical qualities but principally because of its delicious fruit. On ripening (mid-summer) these plants can be harvested, and various exciting raw dishes created.

KW-S-44	Waking Sleeping Seeds
KW-S-45	Sunflower Seeds
KW-S-46	Beautiful Blossom
KW-S-47	Daffodil Dissection
KW-S-48	Pollen Collection-Trip to Park
KW-S-49	Tumbling Tomato Seeds
KW-S-50	Calendula Seeds - Slug Bain
KW-S-51	Lund The Fat Chaffinch
KW-S-52	Lund's Migration
KW-S-53	Broad Bean Pesto
